Subject: FW: Return call on Rolling Knolls

Hi,

Should I print this email as an example of how schedules become delayed? I have not asked ARCADIS to hold off fieldwork. Although I have asked for the EDD to complete our review of the analytical data. Of which we still do not have the results from sample SS-140.

LOL

Tanya, Suzy is out the remainder of this week. You received an electronic version of the Tech Memo on Candidate Technologies yesterday, and should have received hard copies today.

We anticipate submitting the EDD for the data collected during the Data Gaps SAP implementation during the week of April 20. In accordance with the last paragraph of your email, we will hold off on commencing field work, including installation of the new monitoring wells.

Suzy,

Thank you for your follow-up. My phone call last week was to touch base on the status of the Candidate of Technology Memorandum and to get a status on when EPA can expect the EDD for the Data Gaps Sampling Results. Since the Memorandum is due today please let me know the status of the EDD.

Thanks,
Tanya

Hi Tanya,

I apologize for not getting back to you on Wednesday – I have been out of town for the last several days in meetings. I am actually going to be out of the office all of next week as well, so please give John a call or send him an email with your questions regarding the site. I believe he will be out of the office on Monday, so Tuesday would likely be a better day to reach him. His office number is (609) 366-9006.

Also, the group members have requested that they be cc'ed on all future correspondence between ARCADIS and USEPA.

Thanks,

Suzy
